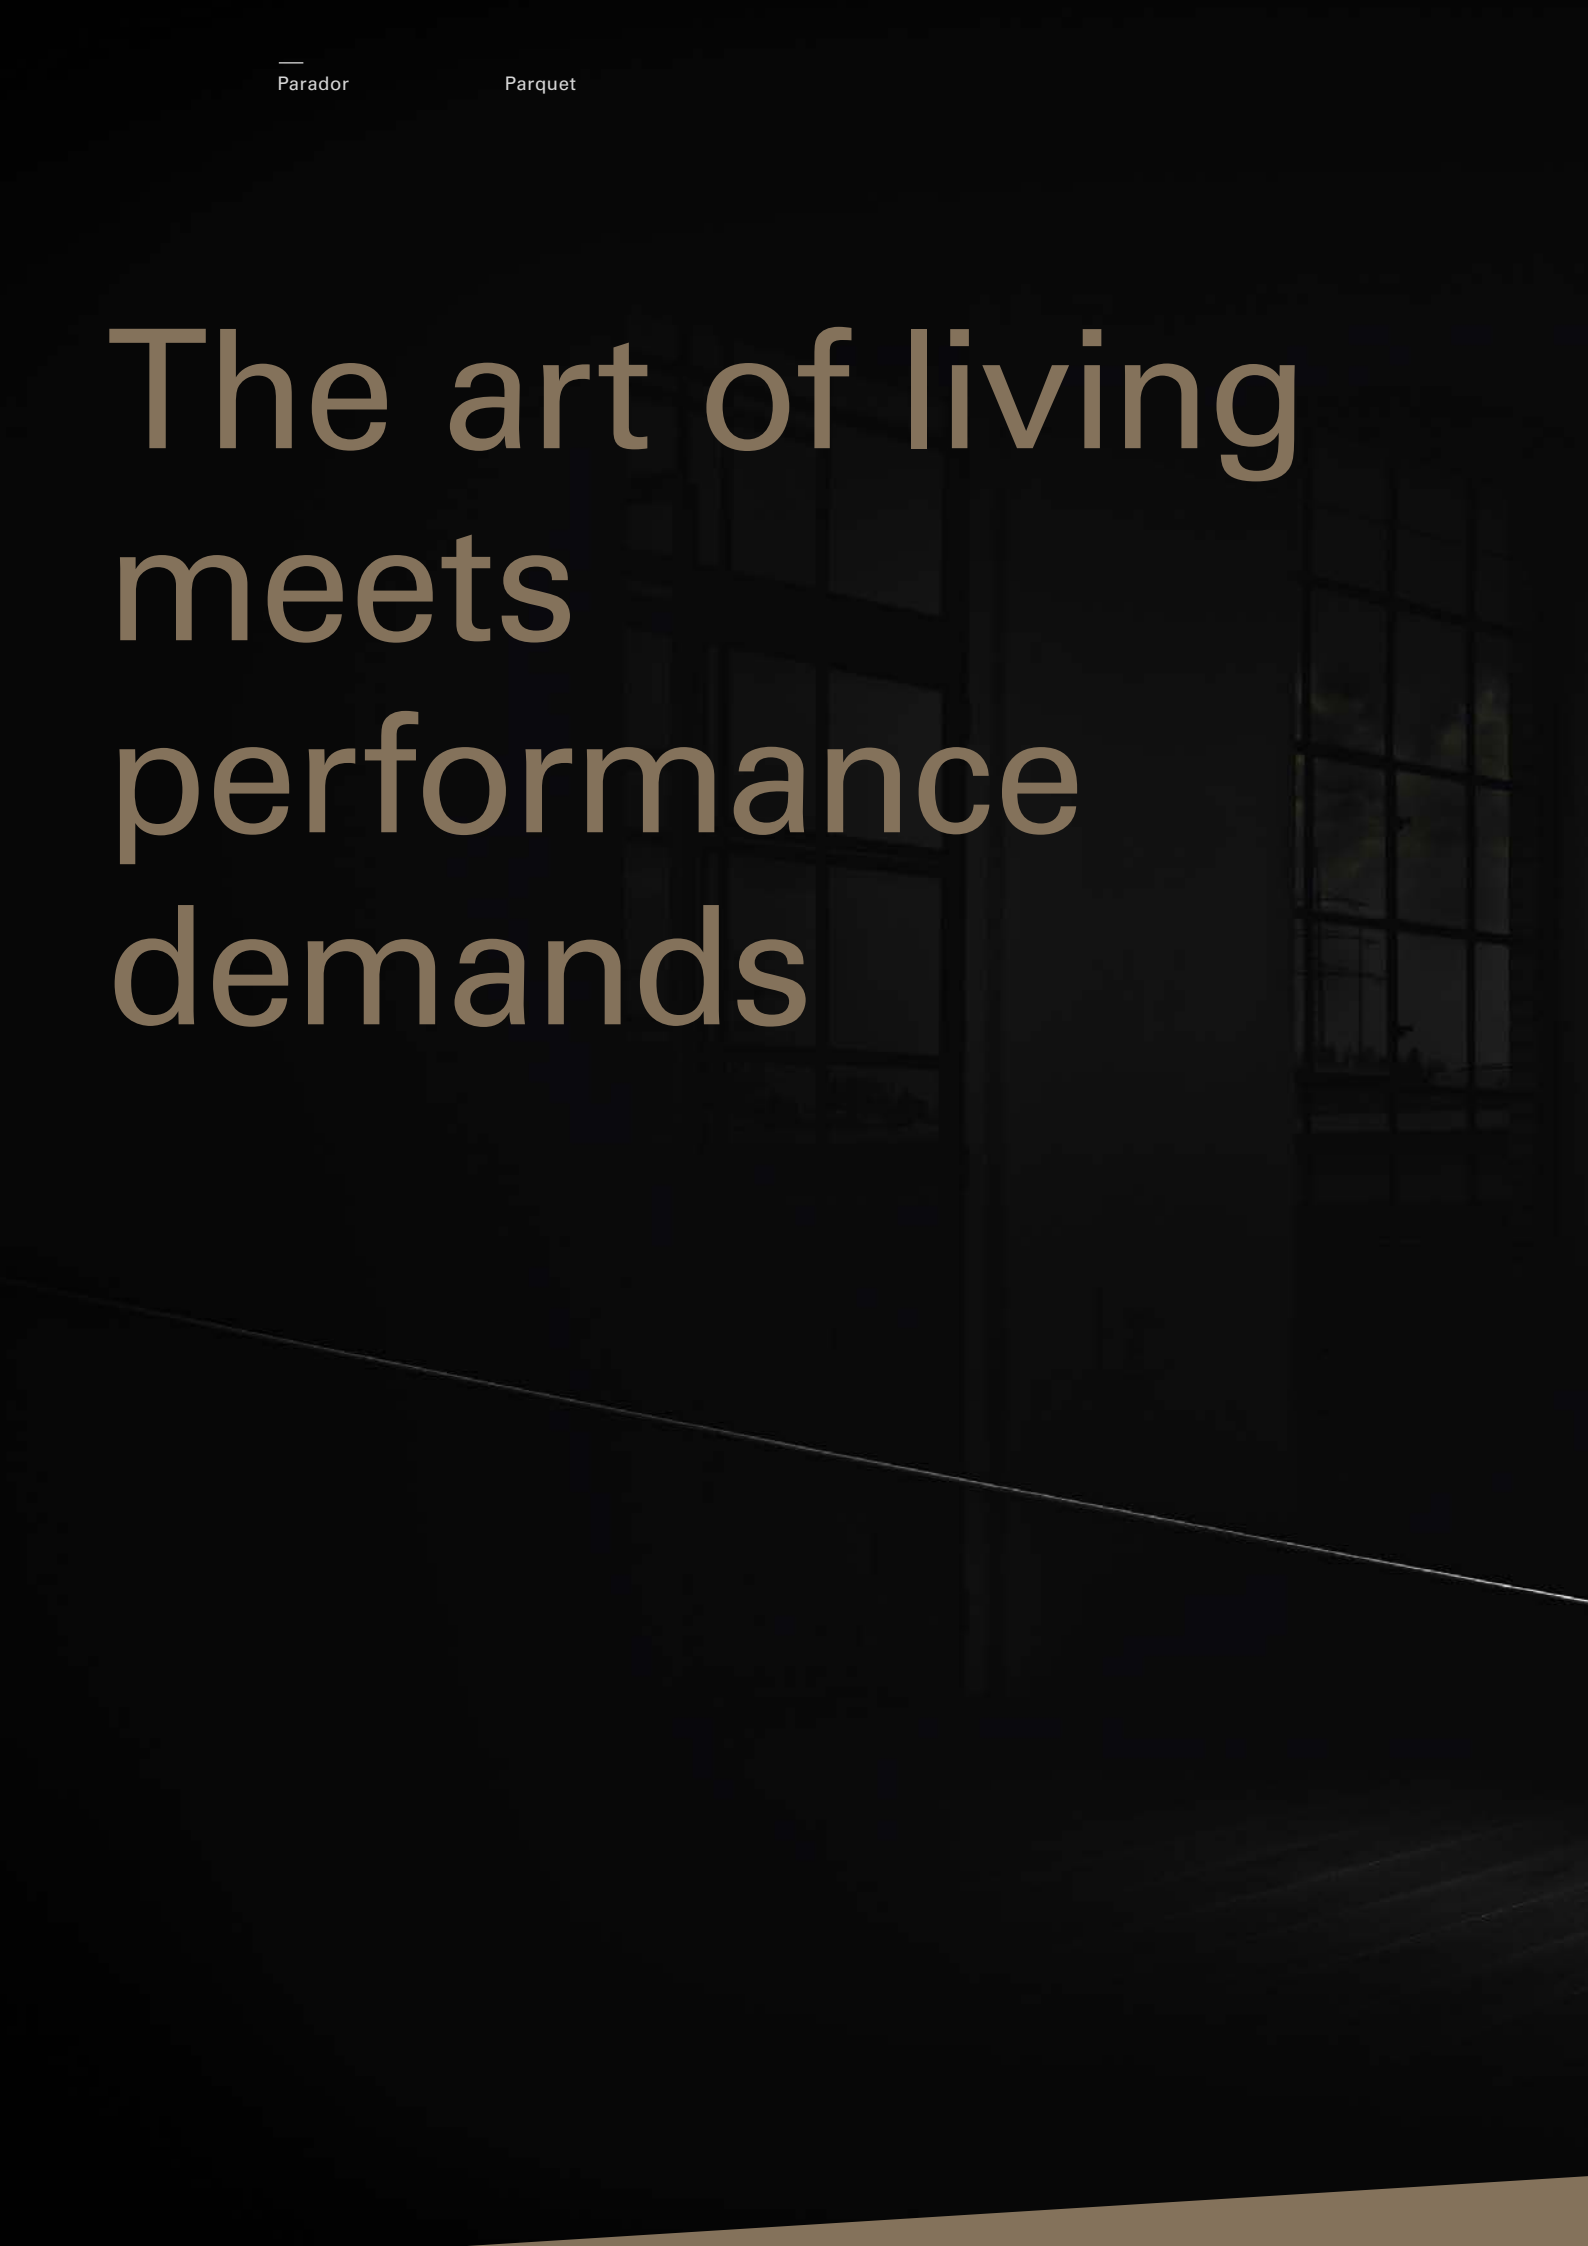
Engineered wood flooring

PARADOR

living performance

The art of living meets performance demands



PARADOR

Good reasons for Parador

Philosophy

We live for products that make every home the most beautiful home in the world. Our value compass points the way: Innovative, sustainable and ecological, we are committed to the highest quality standards in all aspects of our company. In the process we always keep our feet on the ground – the basis of our success.

Inspiration & Design

The contemporary design of our floors is influenced by the latest trends from art, design, architecture and lifestyle. This inspiration is taken up by our design team, which transforms them into innovative and special looks that turn our products into trendsetters of living space design with an outstanding ecological balance.

Quality & Materiality

Parador offers aesthetic flooring concepts for every application, which are produced from high quality and recyclable materials. An authentic look, functional design and the environmentally friendly selection of materials enable the implementation of sophisticated “Made in Germany and Austria” living ideas.

Technology

In order to make laying by hand simple and effective, Parador offers intelligent click connections or high-quality adhesive systems that ensure long-term stability, depending on the product. From use in damp rooms to the integration of underfloor heating, flooring from Parador provides the perfect solution in premium quality for every context.

Healthy living

The production of environmentally friendly products is a key concern for us and is firmly anchored in our corporate philosophy. Our floors promote healthy living, are low-emission and create a pleasant living environment. We mainly use natural raw materials which are subject to constant review.

Sustainability

As a traditional wood processing company, the high regard for the environment is the foundation of our work. For this reason, we want to set standards in all aspects of ecologically responsible production – from raw materials to finished products to logistics.

PARADOR

living performance

Engineered wood flooring – the timeless classic

Engineered wood flooring is the classic among floor-coverings – being both timeless and modern, its material quality represents a natural and pleasant living experience. The wide variety of designs and formats allow for personalised floor design. Parador engineered wood flooring is highly durable, creates a positive indoor climate, is warm underfoot and has considerable charisma.

The Basic, Classic and Trendtime product lines offer engineered wood flooring for every requirement, turning individual living dreams into reality. With the intelligent click system, you can quickly and effortlessly benefit from this timeless “Made in Germany and Austria” classic.

A sense of space with a system

We understand high-quality floors in a holistic way: the perfect interplay of all elements underlines the systemic principles that set Parador apart. Our accessories continue in the design and quality of the high-quality line of engineered wood floors down to the last detail. Skirting boards, end caps, underlays and the perfect care make your floor what it really is: the stage of your life.

Engineered wood flooring – elegant and classic

The solid wood of the high-quality engineered wood flooring from Parador is provided with a lacquer or natural oil surface and is particularly durable. The lamella impregnation on the head side as well as the all-round impregnated top layer ensure enhanced swell-protection. The engineered wood flooring is extremely dimensionally stable thanks to a solid spruce pine middle layer. The patented click mechanism ensures a stable connection. The counter layer veneer made of spruce provides additional support to the composite of the plank. For a long-lasting, beautiful floor covering.

① **Top layer**
Untreated, lacquer or natural oil solid wood

② **Spruce pine middle layer**
excellent shape stability even under the most demanding conditions

③ **Counter layer**
high shape and dimensional stability

④ **Click connection**
custom-fit and connection stable

Product lines

Parador engineered wood flooring is the healthy living classic: the natural material represents a particularly valuable and pleasant living experience. A variety of designs, formats and surfaces allow for the individual design and implementation of personal living dreams. Discover the unique world of the Parador engineered wood flooring in the Basic, Classic and Trendtime lines.

Basic

Those who are price-conscious yet don't want to forgo quality will find in the Basic line a convincing selection of attractive engineered wood floors for a beautiful home.

Classic

Uncompromising in quality, classic in design and universally applicable: the Classic line is created for people with high design and quality requirements.

Trendtime

Impressing everyone for whom flooring is a statement, the Trendtime line offers a unique design range for trend-conscious set-up at the highest level.

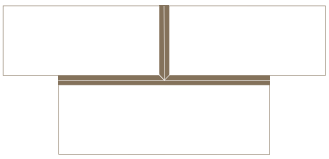
Surface design

Real beauty not only pleases the eye: the natural appearance of the Parador engineered wood flooring surfaces determine the characteristic profile of the floor. Due to the different surface treatments and grades, the character of the wood material is noticeably brought out. It is embossed deeper and flatter, yet is always perceptible.

Bevel design

Without bevel

In the case of the classic laying, the planks connect without any clearly recognisable spaces. The harmonious image of the floor creates a closed overall impression.



4-sided bevel / mini bevel

The long and end edges bevelled on four sides stress the naturalness of the wood flooring, whose every plank is accentuated by the mini 4-V bevel, while the 4-V bevel provides more emphasis.

Finishing

Untreated
Floors without surface treatment are suitable for individual refinement.

Lacquer
A noble, silky shiny lacquer surface offers optimum protection against dirt and stress.

Matt lacquer
The protective natural matt appearance of oil treatment emphasises colour and texture.

White matt lacquer
In addition to matt lacquer: adjustment of colour and textural nuances in the wood by white colouring.

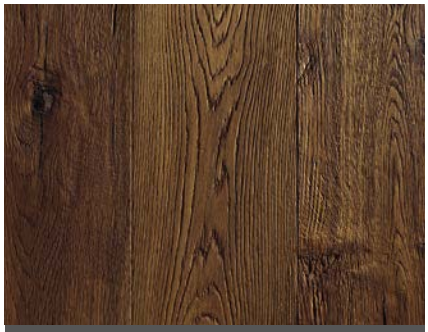
Natural oil
The original character of the wood is brought out. Its own patina develops with optimal protection.

Natural oil white
In addition to natural oil: adjustment of colour and textural nuances in the wood by white colouring.

Natural oil plus
The special protection allows for a fuller feel with improved safety and performance for a home-ready floor.

Natural oil white plus
In addition to natural oil plus: adjustment of colour and textural nuances in the wood by white colouring.

Surface structures

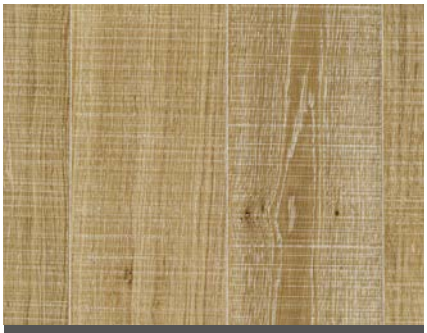


Elephant Skin
Wood features such as grains, knots and cracks are accentuated and give the floor a unique character.

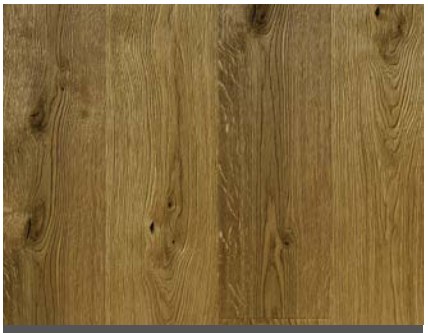
Brushed texture
With stainless steel brushes the natural grain of the wood is intensified and an authentic feel is created.

Handscraped
Individually hand-worked surface, which creates an original character by manual planing.

Handcrafted
A particularly soft and subtle variant among the surface structures, which combines all variants.



Sawn texture
Saw marks from a time when there were no grinders are being recreated for an olde worlde look.



Soft texture
A deep, intensive brushing with soft transitions.

Grade

Select
Due to their harmonious structuring and fine colour nuances, extraordinary floor surfaces can be designed.

Natur
For a floor design with a natural but balanced overall effect, the Natur grade offers the best foundation.

Classic
The Classic grade boasts a vibrant range between a harmonious, natural look and an earthy look.

Living
The Living assortment is characterised by vibrant looks and stresses the earthy character of the wood.

Rustikal
With a knotty appearance, pronounced colour scheme and distinct grain, the grade is particularly original.

Skirting boards and caps

Parador engineered wood flooring offers a wide range of optically matching skirting boards for a harmonious look for any wood surface. Alternatively, the colours of stainless steel, white and black or a primed surface for individual colour design enable the possibility of conscious accentuation.

Depending on the condition of the substrate (masonry), clip or glue joints can be used for optimum wall mounting. Parador skirting boards are prepared for easy installation: with a clip system or groove for adhesive mounting. Interior and exterior corners as well as end caps and transition caps hide saw cuts and make mitre cuts unnecessary. Simply perfect!

Caps

The practical, flexible skirting board caps create clean transitions, corner solutions and finishes for the skirting boards SL3, SL5, SL6 and SL18. The caps are offered in Aluminium look or white.

For the Hamburg mouldings HL1, HL2 and HL3 Parador offers new height variable caps in white.

Profiles

Combine profiles from Parador, bridge and create finishes for a floor aesthetic that is perfect in every respect. Thanks to the patented swivel-joint technology, the profiles are particularly flexible in height. As transition profiles, combine high floor coverings and expansion joints. Adapting profiles are used for the transition between different high floor coverings. End profiles create clean borders with tiles or doors and stair edge profiles create reliable transitions at staircases.

Aluminium profiles

All four versions are offered as aluminium profiles in anodised silver or stainless steel.
They ensure particularly successful transitions from room to room, while providing elegant and skilful accents.

Underlays

Parador offers the optimal solution for every application: the underlays smooth out minor unevenness and at the same time provide high compressive strength. With an integrated vapour barrier the right underlay ensures the required moisture protection in the case of mineral substrates.

Whether a high-tech solution or pure natural product made of wood fibres: underlays from Parador really emphasise the quality of the floor covering.

Product features

Footfall sound / Ambient sound

Parador underlays offer footfall sound insulation in three stages – one, two or three shafts provide particularly effective footfall sound insulation.

Moisture resistance

Parador underlays offer moisture resistance in two stages, which are marked with one drop or two drops (high protection).

Compressive strength / dimensional stability

Parador underlays are characterised by high dimensional stability and compressive strength in three stages – from 20,000 kg/m^2 above 45,000 kg/m^2 up to 50,000 kg/m^2.

Suitable for underfloor heating

Parador floors are optimally compatible with underfloor heating.

Suitable for uneven substrates

Parador underlays compensate for unevenness and are recommended during renovation.

Designs

Akustik-Protect 100
Mineral substrates
High-tech acoustic mats
Thickness: 1.8mm

Akustik-Protect 200
Non-mineral substrates /
Wood substrates
High-tech acoustic mats
Thickness: 2mm

Akustik-Protect 300
Mineral substrates
High-tech acoustic mats
Thickness: 2.8mm

Uno Protect
Non-mineral substrates /
Wood substrates
Footfall sound underlay
Compressive strength up to 20.000 kg/m²
Thickness: 2.2mm

Duo Protect
Mineral substrates
Damp protection and
footfall sound insulation in a Compressive
strength up to 20.000 kg/m²
Thickness: 2.5mm

Parador engineered wood flooring to suit every lifestyle

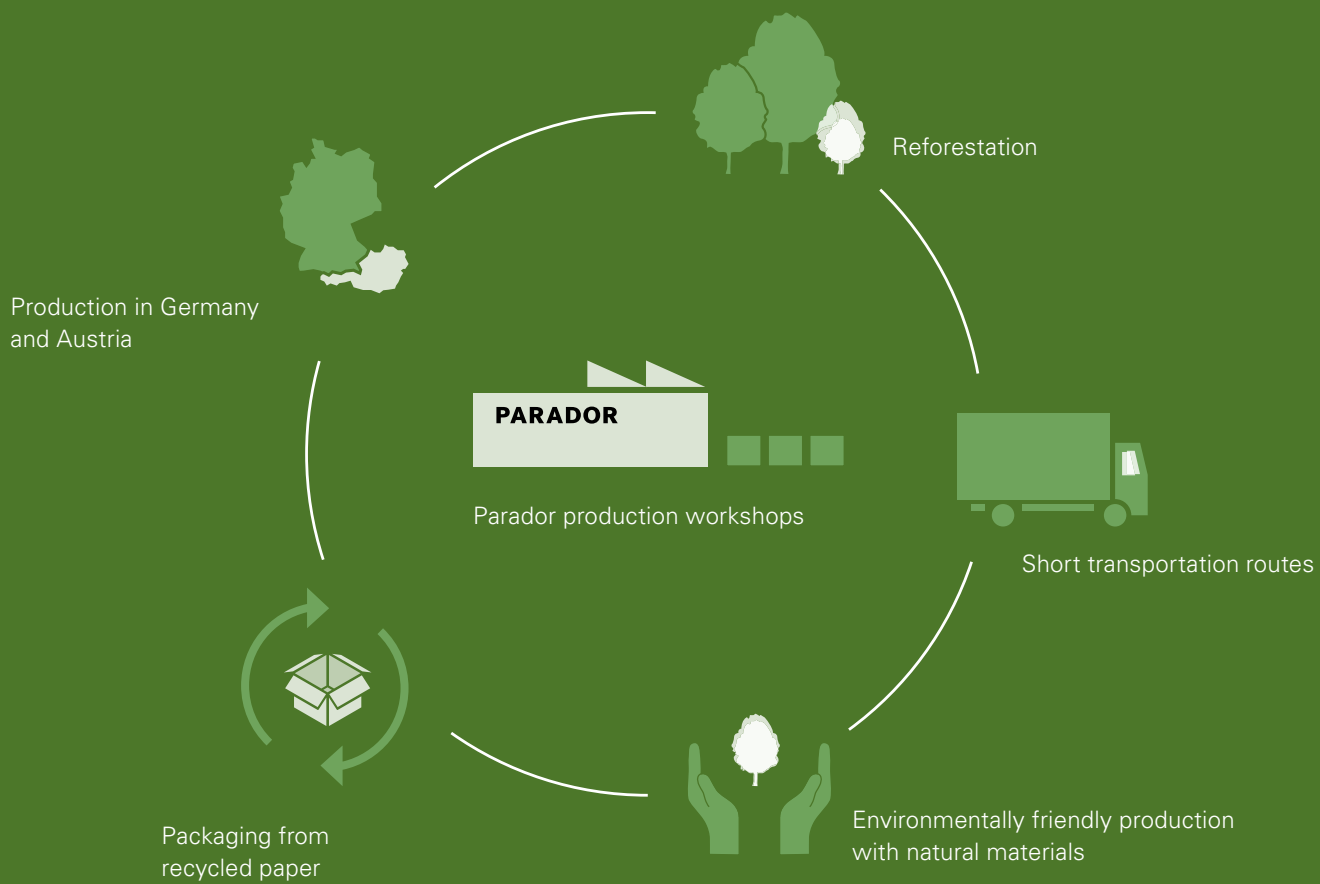
Parador engineered wood flooring represents a particularly valuable and pleasant living experience. Depending on individual requirements for living comfort, healthy living and design exclusivity, the customer – with Parador engineered wood flooring, Eco Balance engineered wood flooring and the Parador series of editions by international designers – receives an extraordinary offer for inspiration and the realisation of very personal living requirements.

Engineered wood flooring – the classic Parador engineered wood flooring represents a natural and noble living experience. The wide variety, the value of the wood and the perfect processing make it one of the most popular floor coverings.

Eco Balance Engineered wood flooring – those who want to live in a modern, stylish and ecological way will find innovation and protection of the environment in equilibrium with Eco Balance Engineered wood flooring.

Edition – individual floor designs from Parador in cooperation with reputable designers, setting new standards for the expression of special value and creativity.

Sustainable setting standards



Certified security from responsibility

As a brand manufacturer, Parador is fully and continuously certified by independent institutions. Production processes, materials, resource and environmental management, as well as product quality, meet the high corporate values of a brand with responsibility, in addition to the legal requirements. Our quality requirement for engineered wood flooring goes beyond legal requirements, which is proved by the various certifications.

EN 14041:2004/AC:2006

The CE marking is obligatory according to EU law in connection with product safety.

The Blue Angel

The "Blue Angel" has certified Parador laminate flooring as a low-emission product. The eco-label RAL-UZ 176.

eco-INSTITUT

Products with this seal meet the most stringent pollutant and emission requirements pre scribed by the eco-INSTITUT.

EPD

Against the background of energy efficiency, sustainability and increasing building certifications, the Environmental Product Declaration (EPD), which is awarded on the basis of the life cycle assessment (LCA), is becoming increasingly important.

Émissions dans l'air interieur (Class A)

This national classification valid in France indicates the quality of indoor air.

TÜV Rheinland

Parador laminate flooring has earned the TÜV certification mark thanks to its perfect product quality, product safety, understandable user documentation and the independent monitoring by the objective institute TÜV Rheinland Germany.

PEFC™

This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.

Good reasons for Parador

Our stance

As a traditional wood processing company, we have a special awareness of our environment. For us at Parador, sophisticated living goes hand in hand with the responsibility to preserve nature for future generations. This includes the sustainable use of our resources. Every product made of wood is an active contribution towards climate protection. As a vital carbon store, wood products are increasingly entering people's consciousness, especially in the field of construction and renovation. Products made of wood and wood materials are sustainable and help to secure the future of the next generations.

Commitment

Parador is the first and so far the only producer of floor coverings to be EMAS-certified. In this way, we are committed to constantly optimising our environmental management: the requirements and components of EMAS include the involvement of all the company's employees, transparent and sustainable communication with the public, continuous improvement of our own environmental performance and compliance with applicable legislation. EMAS is recognised worldwide as the most demanding system for sustainable environmental management.

Production

Our main raw material is wood from predominantly sustainably managed forests. We offer exclusively real wood from controlled sources of supply. The demand for transparency spans all aspects of the value chain and is documented in defined environmental standards for our suppliers. Our production is characterised by the avoidance of emissions and the return of reusable materials into the production cycle, short transport distances and the use of recyclable materials.

Society

We have been involved with the "Plant for the Planet" foundation since 2011, whose goal is to put a stop to the climate crisis. Against this background, Plant for the Planet has set itself the task of planting a trillion new trees worldwide by 2020. Parador is supporting the initiative with tree planting and the organisation of children's academies. In the meantime, we have trained 550 children to become climate ambassadors and have planted 110,000 trees.
